

Graffiti Shield™: BREATHABLE Anti-Graffiti Coating

GRAFFITI SHIELD: Solvent-Free Anti-Graffiti Coating Breathable. Waterborne. Low VOC's

NEW HY-POWER GRAFFITI SHIELD™ SOLVES GRAFFITI PROBLEMS

Hy-Power has developed a more effective solution to the frustrating and expensive graffiti problem facing property owners. Hy-Power's Graffiti Shield works to protect a wide range of exterior and interior porous and non-porous surfaces – e.g. wood, brick, stucco, concrete, metal or marble; to improve structural integrity and protect against future tagging.

After application, vandals subsequent attempts at “re-tagging” are deterred by Graffiti' Shield's™ invisible protective shield. Coated surfaces will not allow various unwanted spray paints, lacquers and enamels to permanently adhere.

BREATHABLE. WATERBORNE. LOW VOCs

This combination of product attributes makes Hy-Power Graffiti Shield™ unique and effective.

Its **breathability** feature allows moisture to escape porous surfaces to avoid cracking or peeling; preserving aesthetic appeal while protecting surfaces from: UV degradation, corrosion, abrasion and future tagging.

Waterborne and low VOC properties make **Graffiti Shield™** safer and better for the environment than solvent based products.

CONVENIENCE and SERVICE

Professionally trained Hy-Power crews will:

1. Remove unsightly graffiti;
2. Repaint and/or colour match the treated surface as specified by the property owner;
3. Apply transparent and environmental friendly Hy-Power Graffiti Shield™ ; and
4. Quickly remove any re-tagging and maintain the ongoing aesthetic appeal of surfaces
